

KNOW YOUR SURGEON BEFORE HAIR TRANSPLANT

Dr. Anagha S Nath

MDS — Oral and Maxillofacial Surgeon

KDC Reg No: 12223

- Approximately 5 years of clinical expertise specializing in state-of-the-art Hair Transplantation and Hair Restoration procedures.
- Extensively trained in comprehensive patient evaluation, personalized hairline architecture, precise graft harvesting, high-density graft implantation, and strategic post-operative clinical care.
- Combines deep maxillofacial structural knowledge with cosmetic hair restoration parameters to achieve optimal density balances and swelling-controlled recovery timelines.

ADDITIONAL QUALIFICATIONS & FELLOWSHIPS

Post Graduate Diploma Clinical Cosmetology [PGDCC]	Surgical Fellowship Fellowship in Hair Transplant Surgery
Facial Aesthetics Workshop Master Course in Facial Aesthetics [MCFA]	Trichology Specialization Master Course in Trichology [MCIT]

"Committed to providing evidence-based hair restoration solutions with emphasis on natural hairline design, patient safety, and long term aesthetic outcomes."

CLINICAL EXCELLENCE FRAMEWORK

Natural Hairline Architecture Custom hairline blueprints matching natural facial dimensions, graft angles, and aging progressions unique to each individual patient profile.	Maxillofacial Precision Advantage Surgical depth regulation and precise follicular positioning ensure maximized survival index indicators for every harvested follicle.
Evidence-Based Patient Pathways Seamless coordination from pre-op multi-angle scalp analysis to structural post-operative monitoring frameworks across all recovery phases.	Sterile Surgical Security Strict clinical safety parameters designed to promote rapid, inflammation-free healing alongside permanent, natural-looking volume.

Case Study 2: Advanced Hair Transplantation (Patient Profile II)

Re-arranged structural timeline showcase mapping the initial pre-op profile, top-down crown density blueprints, multi-angle post-procedure graphs, and incremental density gains at 1 week, 1 month, 3 months, and 6 months.

De Natura Aesthetics for Skin and Hair Transplantation Clinic • Sasthamangalam, Maruthankuzhy, Thiruvananthapuram, Kerala, India

Case Study 3: Advanced Hair Transplantation (Patient Profile III)

Multi-perspective clinical visualization detailing precision frontal and hairline recessional reconstruction progress, featuring comprehensive micro-graft integration and full density restoration.
